Ask your employer if a password to internhousing.com is part of your Intern/Co-Op package.

If it is, you will save time, save money, and conduct your housing search in a safe "Intern friendly" environment.

The Problem: The majority of internship & co-op opportunities are for short terms. Most rentals do not allow "Short Term" leases, and cost more than the typical intern or co-op can afford. Where can you go to find affordable short term housing?

The Solution:

www.internhousing.com provides a simple password protected online solution:

- **Rooms 4 Rent Listings**—internhousing.com provides access to an exclusive database of rooms in local employees homes offered for rent to visiting interns and co-ops. Most of these rooms are furnished and include many amenities, for literally half the cost of any other housing option.
- **Intern Friendly Housing**—In many areas there are a number of nearby apartment communities that offer short-term lease options to interns & co-ops. Internhousing.com allows these communities to list their properties in a special "Intern/Co-Op Friendly Housing" section of the site.
- **Shared Housing Partners**—internhousing.com provides a roommate matching service exclusively for interns & co-ops. This gives you a way to match-up with one or more of other intern(s)/co-op(s) to make your stay much easier, safer, and best of all, affordable.
- **Search Tips**—internhousing.com spells out key tactics interns should use when attempting to locate housing and negotiate short-term leases with apartment managers.
- **On-line Links**—internhousing.com links directly to targeted search engines for rental property, furniture rentals, local transportation resources, entertainment sites and much more.
- **Bottom Line**—You will save lots of time, save tons of money, and be able to conduct your search in a safe, "intern/co-op friendly" environment!
